PACIFIC REGIONAL VISITOR CENTER

The U.S. Army Corps of Engineers Pacific Regional Visitor Center (RVC) is located on the west end of Waikiki, next to the Hale Koa Hotel and on the 2nd floor of historic Battery Randolph, at Fort DeRussy Armed Forces Recreation Area, Oahu, Hawaii.

The theme of the RVC is Partnering in the Pacific. Exhibits, interpretive presentations and outreach education are designed to stimulate interest and convey information on water resources planning and environmental stewardship.* Planning and environmental stewardship calls for a more holistic watershed approach and takes into account the ahupua`a concept, historic conditions, current issues and future possibilities with our partners to create a sustainable future. Projects comply with Federal, State and local environmental laws and regulations to restore project sites, prevent environmental impacts such as pollution and habitat destruction, and conserve and protect the long-term availability of natural, historic and cultural resources at project sites. The RVC is a federal civil works project. Construction of the center was completed March 1983 and the center was opened to the public in May 1983.

* The Corps has reaffirmed its commitment to the environment by formalizing a set of Environmental Operating Principles applicable to all its decision-making and programs. The principles are consistent with the National Environmental Policy Act (NEPA), the Army's Environmental Strategy with its four pillars of prevention, compliance, restoration and conservation, and other environmental statutes and Water Resources Development Acts that govern Corps activities.

Parking lot at the corner of
Kalia and Saratoga roads
** Bring parking ticket **

Battery Randolph
Ewa Entrance
Second Floor

Directions

- From Ala Moana Boulevard, turn right on Kalia Road
- Pass the Hale Koa Hotel (on your right)
